

Smart.

Digital.

Forward-Looking

**Industry 4.0
Power-Workshop –**
The first step
into your digital future

Industry 4.0 Power-Workshop

The first step into your digital future

Are you looking for the optimal solution for the future? Do you want to expand your existing possibilities in the area of industry 4.0? Or should we make your vision our common goal? Together with you, we develop the optimal and suitable strategy for your company. With our Power Workshop we support you selecting and realizing your individual solution for the future. Together, we will identify your options for digitizing your core processes and provide you with a roadmap on how

to master the steps into digitization. We focus on the analysis of information consistency in your core processes from the office to production - i.e. from incoming orders to dispatch. We support you evaluating the current situation and identifying optimization potential. With the concept for your ideal organization, you receive an organizational development plan including an IT concept and an indication for a subsequent software selection.

1 YOUR BENEFITS

- **Transparent** display of your digital fields of action within the shortest possible time
- Evaluation and prioritization of **your potentials**, so that an optimal decision-making ability is achieved.
- **Qualitative evaluation** of your expenses from an expert's point of view

2 OUR FOCUS

- Fast and goal-oriented analysis of your core processes
- Identification of fields of action for the optimization and digitization of these processes
- Prioritizing and recommending the steps necessary for your digital development
